

xm radio is so much better than fm. no commercials. no needless chatter among dj's. we pay for this service that we desire. we have the right to do that as americans. freedom of choice the american way.also living in a very big metro area we need up to the minute traffic & weather reports, as most fm stations only broadcast that info during rush hour as opposed to all of the time like xm does. after listening to xm i never listen to fm maybe that is why you'll want it gone. that should'nt even be an issue. not everybody has xm. again something subscribers pay to have. you should reject petition 04-160respectfully
